

Darkroom News.

You will find some new Paterson tanks and spirals plus a few other odds and ends that were kindly donated to the club.

Please don't put plastic tanks or spirals in the film dryers, they get distorted and then are useless.

The Multigrade enlarger control box has gone "pop" in darkroom 3.
It will be repaired asap. We will get all the enlargers serviced at the same time.

We are planning to decorate all the darkrooms during the Christmas shut down.

Is anyone interested in alternative printing that requires a UV light source?
I am looking at the options and may purchase something if it will be used.
